

How to Make an Origami Duck

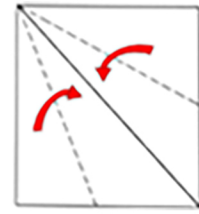

1. Start with a square paper

2. Fold in half

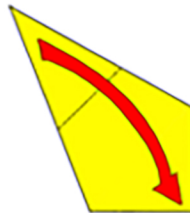

3. Unfold

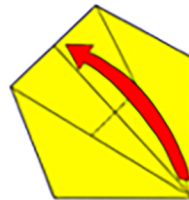

4. Fold the edges in the center

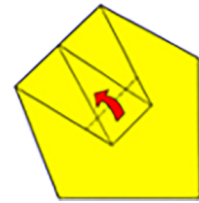

5. Turn the paper over

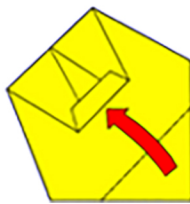

6. Fold the kite in half

7. Fold the smaller point in half

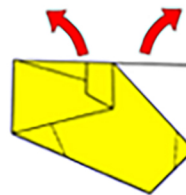

8. Valley fold to crease the head and beak

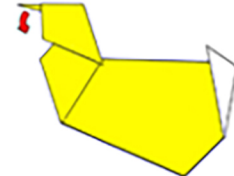

9. Fold the wider point to meet the head

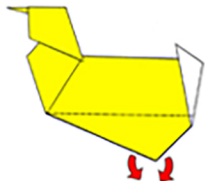

10. Mountain fold in half

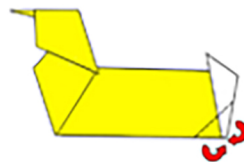

11 & 12. Unfold the head and tail

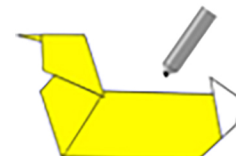

13. Fold the beak away from the head

14. Fold the bottom flaps in

15. Fold back flaps inside

16. Decorate with marker

Directions:

1. Start with a square piece of paper
2. Fold the square in half at a diagonal to make a triangle
3. Unfold
4. Positioning the paper like a diamond, fold two edges in the center fold line to make a kite shape
5. Turn the paper over so the kite is one smooth shape
6. Fold the kite in half matching the top and bottom two triangle points together
7. Fold the smaller point (which will be the head and beak) in half again away from the other triangle point
8. Use the valley point to make the crease between the head and beak
9. Fold the wider triangle down halfway to meet the head
10. Use the Mountain Fold to fold the duck in half so that both sides match and are symmetric
11. Carefully pull the head upward away from the body
12. Carefully pull the tail upward away from the body
13. Carefully pull the beak upward away from the head
14. Fold the bottom flaps inside so that the duck can fit upright on the table
15. Fold back flaps to inside
16. Decorate with marker
